INDEX

ABE, S. The effect of p-chloromercuribenzoate on amoeboid movement, flagellar movement and gliding movement, 107.
Acclimatization of rainbow trout to different salinities, 45.
Accumulation of juvenile hormone in moths, 355.
Acid phosphatase changes in planarians, 285.
Acid phosphatase in snail digestive gland, 211.
Activity in chromatophorotropins of Balanus, 254.
Agrotis, echoes of ultrasonic pulses from, 200.
Alga, reproduction and ecology of Conchocelis colony of, 268.
Alkaline phosphatase changes in planarians, 285.
Allatectomy of moths, effects of, 355.
Amaroucium, significance of caudal epidermis in metamorphosis of, 241.
Amathes, echoes of ultrasonic pulses from, 200.
Ambystoma, gas exchange in, 344.
Aminopeptidase in snail digestive gland, 211.
Amoeboid movement, effect of PCMB on, 107.
Amphibian induction, 125.
Amphipod, lunar orientation of, 97.
Amphipods, osmotic regulation in, 225.
Amphipyra, echoes of ultrasonic pulses from, 200.
Annelid, pelagic larvae of, 163.
Anomalies in x-irradiated hybrid mice, 303.
Antibiotics, role of in culturing crab larval stages, 141.
Artemia, genetics of, 17.
Ascidia, biology of, 31
Ascidian metamorphosis, significance of caudal epidermis in, 241.
Astronomical orientation of sandhopper, 97.
Aurelia, regeneration of larvae of, 337.
AUSTIN, C. R. Fertilization in Pectinaria (= Cistenides), 115.
Autoradiography of dogfish thyroids, 170.
Azide, effect of on ascidian metamorphosis, 241.

BACTERIA, role of in sea urchin gut, as related to division of endocommensal ciliates, 1.
Balanus, cyclic activity in, 254.
Barnacle, cyclic activity in, 254.
Barnacle, temperatures of, 277.
BARTH, L. G., AND L. J. BARTH. The relation between intensity of inductor and type of cellular differentiation of Rana presumptive epidermis, 125.
Bats, perception of flying moths by, 200.
BECK, S. D. *See* D. G. R. MCLEOD, 84.
BEERS, C. D. Relation of feeding in the sea urchin Strongylocentrotus to division in some of its endocommensal ciliates, 1.
BELAMARICH, F. A. Biologically active peptides from the pericardial organs of the crab Cancer, 9.
Bicarbonate ion, effect of on Rana embryonic induction, 125.
Biggaria, division in, as related to feeding of sea urchin, 1.
Biology of Ascidia, 31.
Body temperatures of marine tropical animals, 277.
BOWEN, S. T. The genetics of Artemia. II., 17.
BOYD, C. M., AND M. W. JOHNSON. Variations in the larval stages of a decapod crustacean, Pleuroncodes, 141.
Breathing of Ambystoma, 344.
Breeding season of Pectinaria, 115.
Brine shrimp, genetics of, 17.
BRUNS, S. B. *See* L. E. LACHANCE, 65.

CADDO, proprioceptors in legs of, 262.
Calcium, effect of on Rana embryonic induction, 125.
Calliphorid fly, oogenesis and radiosensitivity in, 65.
Campaniform proprioceptors in phalangid legs, 262.
Cancer, peptides from pericardial organs of, 9.
Carbon dioxide, release of by Ambystoma, 344.
Cardio-excitor material from crab pericardial organs, 9.
Caudal epidermis, significance of in metamorphosis of ascidians, 241.
Cecropia, juvenile hormone in, 355.
Cell division in endosperm, factors in, 193.
Cell fragmentation in Cordylophora, 368.
Cell granules in snail digestive gland, 211.
Cellular differentiation of Rana presumptive epidermis, 125.

Central nervous system of Balanus, chromatophorotropins of, 254.
Changes in phosphatases in planarians, 285.
CHEVERIE, J. C., AND W. G. LYNN. High temperature tolerance and thyroid activity in the teleost fish, Tanichthys, 153.
Chilling, role of in termination of insect diapause, 84.
Chloride exchanges in rainbow trout, 45.
Chloride in hydroids, 322.
Chromatography of crab pericardial organs, 9.
Chromatophore control in Upogebia, 24.
Chromatophorotropin activity in Balanus, 254.
Chromosome number of Pectinaria, 115.
Chromosomes of irradiated Cochliomyia females, 65.
Ciliates, endocommensal, relation of division in to feeding of sea urchin, 1.
Cirripede, chromatophorotropin activity in, 254.
Climate of tropical intertidal zone, 277.
CLONEY, R. A. The significance of the caudal epidermis in ascidian metamorphosis, 241.
Cobalt-60 irradiation of Cochliomyia females, 65.
Cochliomyia, radiosensitivity of, 65.
Coelenterate, formation of endoderm from ectoderm in, 368.
Coelenterate, regeneration in, 337.
Coelenterates, ionic relations in, 322.
Cold, effect of in termination of insect diapause, 84.
Cold, role of in thyroid activity of dogfish embryo, 170.
Colonies of Porphyra, reproduction of, 268.
Compass orientation of pigeons, 311.
Conchocelis of Porphyra, ecology and reproduction of, 268.
Congenital anomalies in x-irradiated hybrid mice, 303.
Contraction, equatorial, as factor in endosperm cytokinesis, 193.
Contraction of epidermis, role of in metamorphosis of Amaroucium, 241.
Cordylophora, formation of endoderm from ectoderm in, 368.
Cordylophora, ionic relations in, 322.
Corn borer, photoperiodic termination of diapause in, 84.
Corpora allata of moths, role of in production of juvenile hormone, 355.
COSTLOW, J. D., JR. Molting and cyclic activity in chromatophorotropins of the central nervous system of the barnacle, Balanus, 254.
Crab, peptides from pericardial organs of, 9.
Crab, variations in larval stages of, 141.
Crustacean, chromatophore control and neurosecretion in, 24.
Crustacean, eye-color mutant in, 17.
Crustacean, peptides from pericardial organs of, 9.
Crustacean, variations in larval stages of, 141.
Crustaceans, water regulation in, 225.
Culture methods for galatheid crab larvae, 141.
Culture of Porphyra Conchocelis, 268.
Cutaneous and pulmonary gas exchange in Ambystoma, 344.
Cyanide, effect of on ascidian metamorphosis, 241.
Cyclic activity in Balanus, 254.
Cyclic factors in lunar orientation of sandhopper, 97.
Cynthia moths, juvenile hormone in, 355.
Cysteine, effect of on cell movement, 107.
Cytochemistry of snail digestive gland, 211.
Cytokinesis, endosperm, factors in, 193.
Cytology of Cochliomyia ovarioles, 65.
Cytology of fertilization in Pectinaria, 115.

DARKNESS, role of in lunar orientation of sandhoppers, 97.
Dark, role of in termination of diapause in insect, 84.
Day-length, effect of on Porphyra Conchocelis, 268.
Day-length, role of in termination of insect diapause, 84.
DEAN, D., AND P. S. HATFIELD. Pelagic larvae of Nerinides, 163.
Decapod crustacean, variations in larval stages of, 141.
Dedifferentiation in regenerating Aurelia larvae, 337.
Developing dogfish, thyroid activity of, 170.
Developing Rana, embryonic induction in, 125.
Developing sea urchin eggs, resistance of to osmotic stress, 182.
Development of Pectinaria, 115.
Development of sea urchin egg, effect of lithium and IBA on, 55.
Development of young ascidians, 31.
Developmental stages of Cochliomyia ovarioles, irradiation of, 65.
Developmental stages of Galleria, nerve cord shortening during, 293.
Diapause, photoperiodic termination of, in insect, 84.
Differentiation of Rana presumptive epidermis, 125.
Digestive gland cells of snail, histochemistry of, 211.

DIMOND, SR. M. T. The relation of whole-body I^{131} uptake to thyroid activity in the developing dogfish, Scyliorhinus, 170.
Dipteran, oogenesis and radiosensitivity in, 65.
Directional training of homing pigeons, 311.
Displaced pigeons, sun compass orientation of, 311.
DITZION, B. *See* R. M. ROSENBAUM, 211.
Division of endocommensal ciliates, relation of to feeding of sea urchin, 1.
Dogfish embryos, thyroid activity of, 170.
Duration of life in galatheid crab, 141.

ECDYSIS and cyclic activity in Balanus, 254.
Ecdysis in Galleria, 293.
Echinoderm, effect of IBA and lithium on egg of, 55.
Echinoderm, relation of feeding in, to division of endocommensal ciliates, 1.
Echinoderm, resistance of to osmotic stress, 182.
Echoes of ultrasonic pulses from flying moths, 200.
Ecology of ascidians, 31.
Ecology of Porphyra Conchocelis, 268.
Ectoderm, formation of endoderm from, in Cordylophora, 368.
Ectodermal fragments of Aurelia, regeneration of, 337.
EDGAR, A. L. Proprioceptors in the legs of phalangids, 262.
Effect of lithium on development of sea urchin egg, 55.
Effect of PCMB on cell motion, 107.
Egg, sea urchin, effect of lithium and IBA on development of, 55.
Egg, annelid, fertilization in, 115.
Eggs, sea urchin, resistance of to osmotic stress, 182.
Electrophysiology of phalangid proprioceptors, 262.
Embryo, Rana, induction in, 125.
Embryology of ascidians, 31.
Embryology of Pectinaria, 115.
Embryology of sea urchin, effect of lithium and IBA on, 55.
Embryos, dogfish, thyroid activity of, 170.
Embryos, sea urchin, resistance of to osmotic stress, 182.
Enargia, echoes of ultrasonic pulses from, 200.
Endocommensal ciliates of sea urchin, division in, as correlated with feeding of host, 1.
Endocrine activity in barnacles, 254.
Endocrine activity in moths, 355.
Endoderm, formation of from ectoderm in Cordylophora, 368.
Endosperm cytokinesis, factors in, 193.
Ennomos, echoes of ultrasonic pulses from, 200.
Entodiscus, division in, as related to feeding of sea urchin, 1.
Environmental temperatures of tropical marine animals, 277.
Enzyme activities in planarians, 285.
Enzymic histochemistry of snail digestive cells, 211.
Epidermis, caudal, significance of in ascidian metamorphosis, 241.
Epidermis, presumptive, of Rana, differentiation of, 125.
Equatorial contraction as a factor in endosperm cytokinesis, 193.
Equatorially displaced pigeons, sun compass orientation of, 311.
Esterases in snail digestive gland, 211.
Exchange of gas in salamander, 344.
Exchanges, chloride, in rainbow trout, 45.
Eye-color in Artemia, mutation of, 17.

FACTORS of equatorial contraction and polar membrane expansion in endosperm cytokinesis, 193.
FARMANFARMAIAN, A. *See* A. C. GIESE, 182.
Feeding, relation of to changes in phosphatases in planarians, 285.
Feeding in sea urchin, relation of to division of its endocommensal ciliates, 1.
Female reproductive system, radiosensitivity of, in Cochliomyia, 65.
Fertilization in Cistenides, 115.
Fertilization in Pectinaria, 115.
Fiddler crab as test object for barnacle chromatophorotropins, 254.
FINGERMAN, M., AND C. OGURO. Chromatophore control and neurosecretion in the mud shrimp, Upogebia, 24.
Fish, osmotic relations of, 45.
Fish, temperature tolerance and thyroid activity of, 153.
Fissurella, temperatures of, 277.
Flagellar movement, effect of PCMB on, 107.
Fluorescence microscopy of Pectinaria eggs, 115.
Flying moths, echoes of ultrasonic pulses from, 200.
Formation of endoderm from ectoderm in Cordylophora, 368.
Fresh-water gammarids, osmotic regulation in, 225.

GALATHEID crab, variations in larval stages of, 141.
Galleria, metamorphosis of nerve cord in, 293.

Gamma irradiation of Cochliomyia females, 65.
Gammarids, osmotic regulation in, 225.
Gas exchange in salamander, 344.
Gastropod, temperatures of, 277.
Genetic effects in heterosis of x-irradiated hybrid mice, 303.
Genetics of Artemia, 17.
Germination of Porphyra Conchocelis, 268.
GIESE, A. C., AND A. FARMANFARMAIAN. Resistance of the purple sea urchin to osmotic stress, 182.
Gliding movement of cells, effect of PCMB on, 107.
Glucuronidase in snail digestive gland, 211.
GOODBODY, I. The biology of Ascidia. II., 31.
GORDON, M. S. Chloride exchanges in rainbow trout adapted to different salinities, 45.
Granular components in digestive cells of snail, 211.
Graptolitha, echoes of ultrasonic pulses from, 200.
Growth of ovaries in irradiated Cochliomyia females, 65.

HAGSTRÖM, B. E. The effect of lithium and o-iodosobenzoic acid on the early development of the sea urchin egg, 55.
HATFIELD, P. S. *See* D. DEAN, 163.
Heat, role of in termination of insect diapause, 84.
Heat, effect of on intertidal tropical animals, 277.
Heat tolerance and thyroid activity of fish, 153.
Helix, histochemistry of digestive gland of, 211.
Hemerocallis endosperm, cytokinesis of, 193.
Heterosis in x-irradiated hybrid mice, 303.
Hexapod nervous system, studies on, 293.
High temperature, role of in termination of insect diapause, 84.
High temperature tolerance and thyroid activity of fish, 153.
High temperatures, effect of on intertidal tropical animals, 277.
Histochemistry of planarians, 285.
Histochemistry of snail digestive cells, 211.
Histology of dogfish embryo thyroid, 170.
Histology of fish thyroid, 153.
Histology of metamorphosis in ascidians, 241.
Histology of regenerating Aurelia larvae, 337.
Homing pigeons, sun compass orientation of, 311.
Hormonal control of molting and cyclic activity in barnacle, 254.
Hormone, juvenile, of moths, 355.
HUTCHISON, V. H. *See* W. G. WHITFORD, 344.
Hybrid mice, x-ray-induced congenital anomalies in, 303.
Hydra, ionic relations in, 322.
Hydranth regeneration in Aurelia, 337.
Hydroid, formation of endoderm from ectoderm in, 368.
Hydroid larvae, regeneration of, 337.
Hydroids, ionic relations in, 322.

IBA, effect of on development of sea urchin egg, 55.
In vitro culture of Porphyra Conchocelis, 268.
Insect diapause, photoperiodic termination of, 84.
Intensity of inductor, role of in differentiation of Rana presumptive epidermis, 125.
Intertidal tropical animals, temperatures of, 277.
o-Iodosobenzoic acid, effect of on development of sea urchin egg, 55.
Ionic relations in hydroids, 322.
Ionic relations in rainbow trout, 45.
Ionizing radiation, effects of on Cochliomyia, 65.
IWASAKI, H., AND C. MATSUDAIRA. Observations on the ecology and reproduction of free-living Conchocelis of Porphyra, 268.

JOHNSON, M. W. *See* C. M. BOYD, 141.
Juvenile hormone of moths, 355.

KCN, effect of on ascidian metamorphosis, 241.
